

Opportunity is Knocking!

Save your Business Money

As part of the recent economic stimulus package, the IRS Section 179 deduction has been increased to \$250,000 for 2009. That means your business can expense up to \$250,000 for equipment, even software, placed in service this year. This expanded deduction can help reduce your tax bill and save you money.

Leased equipment is also eligible for this deduction. Lease your equipment to conserve your capital, manage your cash flow and take advantage of this opportunity from the IRS. We can even structure a lease with \$99 payments for the first six months.

Lease the equipment you need, make \$99 payments for the first six months and get a generous tax write off.

Don't let this opportunity pass you by!

One of our business partners BSB Leasing is available to help you with this, please contact Bill Wilson at the below contact information to find out more.
